## Personal statement:

Multilingual, international self-taught Frontend Developer, with previous experience in sales, Management and Marketing, seeking to launch a career in building web applications and services. Started learning computer programming as a hobby, back in 2020, following freeCodeCamp and various courses on Udemy, while I was still working. I'm a quick learner who has gained knowledge and experience using JavaScript, React and libraries that leverage unique techniques, in developing web applications from the ground up.

## EXPERIENCE

### WEBORATORY LTD London, UK — Frontend Developer August 2021 — Present

- Worked on existing applications for different clients, building new features and optimizing existing ones
- Error debugging and troubleshooting and perform routine optimizations
- Collaborating with senior developers and designers to build pixel perfect, fully responsive designs from mock-up

### FREELANCE London, UK — Frontend Developer April 2020 — Present

- Self-learning how to build web applications from scratch, experimenting with CSS, SASS, Material UI and Styled Components to create visually aesthetic applications
- Integrating with third-party services and external APIs
- Utilized HTML5, CSS3, Javascript, React.js to create websites and applications as personal projects
- Writing reusable and documented code

### MARBLE CITY LTD London, UK — Operations and Logistics Assistant May 2019 — August 2021

- Broad experience in oversight of daily manufacturing operations and logistics, reviewed production orders, schedules, delivery dates to meet production schedule
- Built company's social media pages, which quickly gained 2000 followers and created content increasing site conversion by 20%
